# HANDS-ON COMPOSITE COURSE

---

**2-DAY COURSE DATES 2018**

Taught by

**Andrew Chandrapal & Gurvinder Bhirth**

After

## Andrew Chandrapal

BDS, MFGDP(UK), DPDS, MCLinDent(Pros)

Qualifying from Birmingham University, Andrew has rapidly progressed to achieve further qualifications and training which form the basis of his special interests, dental cosmetics, composite resin bonding, complex rehabilitation and management of wear.

Andrew works with eminent colleagues in various disciplines of dentistry to create smiles that not only look naturally outstanding but also function efficiently and comprehensively.

Andrew has gained knowledge in all aspects of restorative disciplines and continues to update his knowledge with international studies on a regular basis. His interests and skills have led to attaining a Distinction in a double Masters of Clinical Dentistry (MCLinDent) in fixed and removable prosthodontics as well as 2 further academic diplomas. He is also a Graduate of the Kois Centre, based in Seattle – of which only a handful have attained this 9-step level of training within the UK.

Andrew is President for the British Academy of Cosmetic Dentistry and a long-standing member of the AACD, the International Team for Implantology, the Association of Dental Implantology and the British Society of Occlusal Studies.

He is also an educator to other dentists on a nationally and international level. Andrew is a key opinion leader to the industry within the disciplines of aesthetic dentistry, treatment planning and composite resin artistry.

# OVERVIEW

This two-day course is essential for clinicians looking to take their composite skills to a higher level. Composite resin is one of the core materials in modern day dentistry and as patient expectations increase, the skill-level of the dental professional must also develop to ensure they meet these expectations. Presented by Dr Andrew Chandrapal and Dr Gurvinder Bhirth, this unique 2-day course offers dental clinicians the opportunity to rapidly increase their clinical skills in a highly interactive, enjoyable classroom environment.

The key focus of this international quality course is the hands-on element. It will be conducted in a step-by-step approach where delegates can discuss their work with Andrew and Gurvinder as they review each stage. Innovative placement techniques, an understanding of opacity and new polishing protocols are just some of the elements that the delegates will learn in detail. All these techniques and more, are designed to enable each clinician to produce stunning results when they return to practice with the ultimate aim of exceeding patient expectations.

Such is the popularity of Andrew and Gurvinder, that this course is likely to sell out quickly. Therefore, it is advised to book early to avoid disappointment.

## Gurvinder Bhirth

BDS

Gurvinder works in a periodontal and referral practice in Birmingham offering a wide range of dental treatments. He has an interest in minimal intervention dentistry, particularly direct composite restorations. His work with composites won him a place on the Composite Masters course held by the Style Italiano Group in Pisa. Since qualifying from Liverpool University in 1997 he has worked in a number of NHS and private practices, both in the UK and Australia.

Gurvinder is a member of British Dental Association BDA, British Association of Cosmetic Dentists BACD, Association of Implantology ADI, The British Society of Prosthodontics BSSPD.

# 2-DAY COURSE DATES 2018

14 hours  
verifiable CPD  
available

# Day 1

**Anterior Course.** The lecture will cover the planning, theory and principles behind composite resin technology, specifically aimed at the anterior smile zone. Hints and tips will also be given to ensure simple, easy placement techniques, while doing so within realistic time constraints. Exercises will largely be based around making putty stents and learning the importance of layering to surpass your patients' expectations.

# Day 2

**Posterior Course.** The second day lecture will cover the latest trend to simplify posterior restorations while ensuring complete function for the patient. The techniques shown will be carried out by the delegates in the extensive hands-on sessions, to ensure these simple tips will be carried into everyday practice. Exercises will include the restoration of a Class I, as well as further exercises on Class II cavities ensuring good contact points are achieved.

---

### Comments from previous courses given by Andrew Chandrapal:

“Excellent teaching by Andy, very knowledgeable in composite and adhesive dentistry”

“Many practical tips that can be used in practice immediately. Great course, worth every penny!”

“Excellent hands-on course which reinforced existing knowledge and taught new skills”

“A valuable and informative day with lots of practical advice and tips”

“Excellent. Practice-changing”

“Never did I think posterior composites could be placed with such predictability”
