Advanced Composite Techniques

with Dr Jason Smithson

Unique 2-day course in the UK

This master class is designed to allow the experienced practitioner to confidently approach more challenging anterior cases with direct resin in combination with a sound understanding of functional occlusion.

Real life clinical scenario: treat three anterior teeth simultaneously on one model in real time

Resin veneer for reconstruction of worn teeth, peg lateral and discoloured tooth

Two-day intensive class: 75% hands-on with evidence based data.

2-day advanced course 2020

Manchester - April 3rd & 4th

Hilton Deans Gate, 303 Deansgate, Manchester, M3 4LQ

£864 (inc.VAT)

Registration is 8:30am with a 9:00am start

What you will learn

- A simple approach to the direct resin veneer: create masterpieces easily and predictably
- How to handle the peg lateral and microdont teeth
- Functional smile design
- How to handle complex cases such as discoloured and misaligned teeth with direct resin in conjunction with simple predictable home whitening
- An intuitive approach to reconstruct worn broken down teeth creating functional occlusions with direct resin. To include increasing the vertical dimension and re-establishing anterior guidance.

Hands-on component

All aspects will be covered on a single typodont model in a user-friendly manner, which is applicable to the General Practitioner and Specialist alike. Dr Smithson throughout will carry out each exercise in a stage-by-stage 'Follow my Leader' fashion with close support. The approach is Casual and delegates are encouraged to ask questions as they work.

Learning Objectives:

- The Resin Veneer for the discoloured tooth (lateral incisor)
- Reconstruction of the worn tooth (Central Incisor)
- The Peg Lateral Incisor

Direct Resin Solutions

with Dr Jason Smithson

Jason Smithson is simply one of the best teachers of composite resin in the world.

A high-street, practicing dentist, Jason is able to empathise with the pressures in modern day practice.

Theory in a relaxed informal style, then extensive hands-on sessions, in a step-by-step approach.

Teaches delegates many hints and tips to transfer their new skills into their everyday dental office.

2-day course dates 2020

London - May 1st & 2nd

London Ambassadors Bloomsbury, 12 Upper Woburn Place, Bloomsbury, London WC1H 0H

Bristol - October 16th & 17th

Bristol Double Tree Hilton, Redcliffe Way, Bristol BS1 6NJ

£699 (inc.VAT)

Registration is 8:30am with a 9:00am start

Day 1

Lecture and Hands-on Exercises

The posterior lecture will cover isolation, cavity design, morphology and function, as well as placement techniques that will help avoid any future post-operative sensitivity issues.

Exercises will consist of a Class I and a more complex Class II cavity, utilising sectional matrices. Follow Jason through a step-by-step approach. Gain confidence to use these techniques and reproduce composite restorations to a higher level.

Day 2

Lecture and Hands-on Exercises

The lecture covers cavity design, shade taking, morphology, composite placement and polishing techniques. Composite opaque shades are vital in increasing aesthetic outcome and this covered with hands-on exercises.

Exercises following Dr Smithson in a step-by-step approach. Including an everyday Class IV restoration, an advanced Class IV iand customised polishing techniques.

**14 HOURS VARIFIABLE CPD
AVAILABLE ON BOTH COURSES**

Dr Jason Smithson

BDS DipRestDent RCS (Eng)

Jason qualified at the Royal London Hospital in 1995 obtaining a series of awards, including the Overall Award for Clinical Dentistry.

Since graduating, he achieved the 'Diplomat Status in Restorative Dentistry' from the Royal College of Surgeons (England).

His specific areas of expertise are; direct composite-resin and minimally invasive all-ceramic restorations. According to his peers, Jason is a world-leading authority and educator of simplified composite resin techniques. This global reputation means he is in demand as both a keynote speaker and hands-on trainer throughout the world.

His evidence-based teaching style aims to increase the knowledge, skill and reproducible outcome for any GDP or dental therapist. Delegates who adopt his proven, simplified techniques will develop far greater consistency and gain even higher aesthetic outcomes for their patients.

Jason practices at Revitalise Dental Centre in Cornwall is also co-author of "Vertical Margin Finish Line in Fixed Prosthodontics".
