

A rare opportunity to
spend a full day* with
Dr Dennis P. Tarnow
at the Aesthetic and Digital
Dentistry conference, Cyprus
Fri 6th and Sat 7th* July 2018

Saturday 7th July; 9am - 5pm:
*Immediate Extraction Socket
Management*
and
*Treating the Esthetically
Compromised Patient*
with Dr Dennis P. Tarnow

Sponsored by  SOUTHERN IMPLANTS

In conjunction with 

Fees: £350 per person

Evening welcome reception Friday 6th July; 7.30pm

Sponsored by  IMPLANT DIRECT

Venue Address:
UCLan Campus Cyprus,
12 - 14 University Avenue,
Pyla, 7080 Larnaka, Cyprus

organised in association with **VSSAcademy**
continuing dental education

Programme of events:

Friday 6th July; 1-5pm

The Digital Dentistry Workflow in General and Implant Dentistry

with Mr Patrik Zachrisson and Mr Ashley Byrne

Session 1 with Patrik Zachrisson:

A digital approach to dentistry for the General Practitioner – how to integrate digital dentistry into your practice

At the end of this session the participants will understand;

- Prosthetically driven implant planning
- CBCT types and history to present
- Intra-Oral scanning – different types of scanners on the market, including the lab scan
- Planning software
- Guided surgery – implant system-specific kits and different approaches
- Digital restoration – chairside and laboratory
- How to connect with your lab for a smooth workflow and best outcomes
- Case study
- How to build your own in-house laboratory
- Digital orthodontics – removable appliances and retainers, digital partial dentures, splints and snoring devices

Session 2 with Ashley Byrne:

Digital Restoration – making dentistry a better place

At the end of this session the participants will understand;

- How to demonstrate the ease of adapting to a digital workflow from the restorative perspective without the need to change from the conventional impression techniques
- Simple planning to complex implant work – all aspects of the digital workflow
- Benefits to the patient with live cases, ranging from cost saving, biocompatibility and reduction of failures and fractures
- The benefits of implementing intra oral scanning
- The advantages to the patient and the dental professional team
- Benefits of 3D printing

Saturday 7th July; 9am-5pm

Session 1: What we know, what we think we know, and what we don't know about Immediate Extraction Socket Management

Session 2: Interdisciplinary Approach for Treating the Esthetically Compromised Patient

with Dr Dennis P. Tarnow

Session 1:

Immediate placements of implants into extraction sockets is an exciting treatment alternative for our patients. However, there are many potential short and particularly long term risks which the practitioner must be fully aware of. This presentation will focus on the potential problems and benefits both clinically and biologically when the choice of immediate socket placement is made for single and multiple sites.

Upon completion of this presentation participants should be able to:

- Identify what type of healing takes place against the implant in immediate socket placement
- Know how to minimize recession with immediate provisionalization
- Know the proper crown contour for immediate provisionals
- Know if the gap distance really matters
- Know if primary closure should be attempted or should it be left open?
- Know if membranes should be utilized?
- Know what type of graft material if any should be utilized?
- Identify what are the potential short and long-term risks involved with immediate placement of implants?

Session 2:

The treatment planning of complex cases requires the highest level of knowledge and skill of the treating team. It is an orchestration of procedures including proper sequencing and timing that makes the difference. An envisionment of the final case before starting is required to know where the goal of treatment will be directed. This, in conjunction with the patient's needs and clinical situation comprise the decision-making process for what is the best treatment for the patient.

Problems facing the team such as:

- Which teeth to save or extract?
- Should implants be placed immediately or in a delayed protocol?
- Should multiple implants be placed in the aesthetic zone?
- When and how to include orthodontics if needed for sight development
- Should pink ceramic be used or should ridge augmentation be performed?
- Should the case be splinted or broken up into separate bridges or individual teeth?
- How to provisionalize the case throughout treatment
- When to immediate load cases versus do a serial extraction case

These concerns will be addressed in this interdisciplinary approach to our most challenging cases.

Fees: £350 per person
